TOM MIX IN

The Arizona Wildcat

Tom Mix is always good but he has never been better than in this story of a cowboy and a society girl and a gang of eastern crooks.

The Arizona Wildcat gives Tom a chance to perform some feats of horsemanship that have never been equalled before.

Also 2-Reel Monkey Comedy and Paramount News.

THIS WEEK--John Barrymore in "DON JUAN."

Coming Next Wednesday, March 21
"The Understanding Heart."

Safe Combinations Are Destroyed

Looked Like Simon Pure Amateur Work

Champion seems to have some very interesting burglars in its vicinity but the burglars and the owners of the property involved. On Saturday night the premises of W. C. Hoskins, H. E. Gill and L. J. Adams were entered and the combinations on three safes chopped off, necessitating the importation of an expert to open the safes and the sending of the doors to Calgary for repairs. Apparently no goods were taken or other property disturbed. The Beaver Lumber Company office was also entered, but fortunately, as it happened, the safe was not locked and the burglars secured a small amount of cash. The police investigated but as far as is known, without result, as practically no trace was left to point to the malefactors. It is but a short time since the cash registers in some of the business places were rifled with unnecessary damage to the registers.

Wheat Pool Meeting Next Wednesday

A meeting in the interests of the Wheat Pool will be held in Campbell's hall, Champion, on Wednesday, March 21st, at 2:30 o'clock. J. J. Strang, a director of the pool will be the principal speaker. Everyone, whether members of the Wheat Pool or not, are cordially invited to attend and hear a discussion on the greatest cooperative movement in the world.

Champion Retains McNaughton Cup

Two rinks from Vulcan skipped by Messrs. Wolfe and McMillan played in Champion for the McNaughton cup on Saturday night. The final result was a victory for the Champion rinks by two points. The games were both good ones and the result was in doubt until the last end was played. McLean and Woodhill skipped the Champion rinks.

R. C. Crane Will Hold Auction Sale

Having disposed of his farm adjoining town, R. C. Crane is offering the entire equipment including horses, implements and household effects by public auction on Tuesday, March 27. As Mr. Crane has been operating one and one-half sections of land the sale will be an extensive one and will furnish an opportunity to secure almost anything required on a farm. A. Hopkins is the auctioneer.

J. F. Hardisty, of Spokane arrived in Champion last week, and will likely spend the summer.

Oscar Castator, who has spent the winter in Vancouver and other coast points, returned home on Saturday.

E. Camlini, of the Savoy Hotel, has purchased a new Chevrolet truck from J. M. Moffatt, which he will use in connection with the hotel business.

Around 500 Attend Elks' Dance

One of the largest crowds ever assembled for a dance at the Carmanagay Hall attended the Elks Grand Ball last Friday night. Around 500 people took in the affair and not for a moment during the progress did the interest or enjoyment lag.

Johnnie Anderson's orchestra put over their music in great style and received high compliments from everyone.

Once more the "Bills" scored, and are again recognized as the best people on earth especially as entertainers.

Everyone will look forward to the Elks next dance.

The Carmanagay ladies' deserve great credit for the way they handled the large crowds for supper.

The Elks know how to put it over right.

W. I. Enjoys Good Program

Champion W.I. met at the home of Mrs. B. N. Woodhill on Tuesday afternoon. Good attendance reported, and a very enjoyable afternoon was spent. The matter of a school clinic was discussed. Mrs. G. Dow gave an interesting address on "Education and Better Schools" which was much appreciated. Following this address Miss Barclay gave a reading that was thoroughly enjoyed by all. A dainty lunch (suggestive of St. Patrick's Day) was served by Mesdames Bond and Watkins.

Mrs. Wise's Paper Read at Convention

A paper recently read at the W.I. meeting here on "Home Economics" by Mrs. Wise was read by Mrs. Marshall at the convention in Lethbridge. Mrs. Wise had gathered many suggestions for labor-saving in the home for the preparation of well balanced, nourishing food and meals. She urged the study of home-making for all the sciences that make women intelligent about the home, and its needs are the most weighty.

C. H. Sutton Adds To Land Holdings

C. H. Sutton has purchased the Maynard half section, east of town, the price reported being \$20 per acre. This makes seven quarter sections Mr. Sutton has in that vicinity.

Frank Dalsin Holding Auction

Frank Dalsin is offering his live stock, implements, etc., for sale by public auction on Thursday, March 22. A. Hopkins is the auctioneer.

P. T. A. to Hold Social Evening

The P.T.A. is holding a social evening in the church on Monday, 19th, commencing at 8:15. An invitation is extended to all those who are not members to join up before that date and attend this social. The membership fee is 25 cents.

NOTES AND COMMENT.

The movement towards the motorizing of farms has grown by leaps and bounds during the past year in this vicinity, and this spring will see horses go farther towards the discard. The largest number of tractors ever purchased here in one season will go out this spring, and last fall's purchases of trucks was phenomenal. While it remains to be seen whether the change will be permanent, there can be no doubt that with present tendencies continued power farms will be the rule rather than the exception in the very near future.

NEWS NOTES

More than two thousand farmers in the southern part of Alberta have joined the special livestock demonstration train being operated jointly by the provincial Department of agriculture, and the Canadian Pacific Railway. During the past three weeks the train has made stops at Macleod, Monarch, Kipp, Diamond City, Iron Springs, Picture Butte, Turin, Condale, Taber and Sterling, and an average of over two hundred farmers have been in attendance at each of these points. The tour will continue for a further three weeks during which time lectures and demonstrations will be given at seven other points.

Alberta Provincial Saving Certificates have proved a popular form of investment since the first of the year. According to officials of the Treasury Department, the gross sales amounted to \$1,188,912 in January, and \$565,208 in February, and allowing for withdrawals the net business to the end of the first week in March totals \$808,977.

A record high price of \$1,000 was paid during the past week for a seat on the Calgary Stock Exchange, by Solloway Mills & Co., of Toronto. This company plans to open a branch office in Calgary as part of their continent-wide service to investors.

Large quantities of Alberta tar sands may be used during summer in connection with an extensive program of road building to be undertaken in the province of Manitoba. Representatives of Alberta tar sands companies have been in negotiations with Manitoba authorities for some time, and the plan under consideration involves the erection of a plant at McMurray or some other point adjacent to the deposits, where the tar can be extracted from the sand in order to reduce the cost of transporting this road building material.

Fire of unknown origin completely destroyed the derrick on the site of the Home No. 3 oil well in Turner Valley, last Wednesday morning. At the

last report from the drillers the well, which was started only recently, had reached a depth of 132 feet.

A Want Ad. Will Do It.

I'll tell you why I'm going to buy a Westinghouse—

"Those new Westinghouse Sets are great! I was over at Bill's last night to hear the radio he's been talking so much about. Oh boy, its some set. There's a much difference between it and an ordinary set as there is between this car and my old bus. When you think it over, it's just what you'd expect from Westinghouse. They were the pioneers of both Alternating Current and Radio so you'd expect them to build the most advanced models operating on the lighting circuit. And another thing, Westinghouse have selected the most competent radio merchants in town as Westinghouse Dealers. We will gladly demonstrate the 1928 Westinghouse models and explain the many improvements that make them better."

Commander Byrd Sketches Plans For His Proposed Dash To The South Pole This Fall

Reclining in an easy chair at the Governor's mansion at Richmond, Virginia, Commander Richard Evelyn Byrd pictured the time when he would be camped at a stationary ice berg, 2,300 miles from the nearest human dwelling, on his projected expedition trip to Antarctic regions.

Commander Byrd said his expedition would sail south in September, 1928. He expects to return by June, 1929, though there was a possibility, he said, that he might be delayed a year.

New Zealand is to be the first stop of the adventurer and his men. Then comes the voyage for the Ross ice barrier, 2,300 miles to the south.

The main base of the expedition will be at the Bay of Whales, where the Amundsen had his headquarters, according to present plans.

"This is 2,300 miles from the nearest human dwelling—the farthest people have ever lived from civilization," Commander Byrd said, "and there we shall establish a small village."

"After making camp, we shall establish several small huts. Then comes the voyage for the Ross ice barrier, 2,300 miles to the south."

The main base of the expedition will be at the Bay of Whales, where the Amundsen had his headquarters, according to present plans.

"This is 2,300 miles from the nearest human dwelling—the farthest people have ever lived from civilization," Commander Byrd said, "and there we shall establish a small village."

To Improve Quality Of Canadian Barley

Conference In Ottawa Attended By Representatives From Provinces

Improvement steps to improve the quality and broadening the market for Canadian barley were taken at a conference held here in Ottawa under the direction of Dr. J. H. Crisdale, deputy minister of agriculture. All the province producers were represented.

A committee has been appointed to investigate the question of securing the varieties and strains best suited to the different localities where barley can be profitably grown.

The committee includes L. S. Newman, Dominion cerealist and Professor T. J. Harrison, of the Manitoba Agricultural College, Winnipeg.

A seed committee also was appointed with Major G. L. Strang, of Fenn, Alta., as a member, while a barley market extension committee was formed, composed of L. H. Timm and Professor Grant, of Winnipeg.

Several of the delegates stressed the importance of barley as a winter wheat and oats could not be successfully produced, and recommendations made for adopting new barley grades. A committee was appointed to see what could be done to secure amendments to the Canada Grain Act which would provide grades for malting barley.

The final flight to the Pole will be the most hazardous. In addition to the radio, we shall use a kite to get in touch with the last base. As the South Pole is on the last plateau, 10,000 feet high, landing will be difficult. The air at the height of two miles has just such densities that it requires a great deal of power to take a plane off the ground and we shall land with at least 1,500 gallons of gasoline and 1,000 pounds of emergency equipment. Our landing speed must be fast."

For the flight to the Pole a big monoplane with three engines and a wing spread of 76 feet, probably will be used, the Virginia pilot said. In addition, the expedition will carry two single engine monoplanes of the type used by Chamberlain on his trans-Atlantic flight. He will be used to keep in constant touch with civilization and an "ice ship" with a bowled hull and two propellers. Timbers to push ashore ice is being constructed. Fifty-four men, including a dozen experts, will make the trip. Flooded by the sea, who accompanied Byrd to the North Pole, will be second in command.

Maps of the polar regions will be made of everything encountered and the scientific data brought back to civilization. The frozen area to be explored is larger than the United States and Mexico combined.

"Science is the loser so long as there is a large, unexplored area in the world," Byrd said. "This trip is primarily for scientific purposes and I regard whatever hazards encountered as justified by the increase in man's knowledge which the expedition will make possible."

When White Pine Was King
The early history of the lumbering industry in Canada is practically the history of the lumbering of white pine. In the early days of lumbering, the white pine was considered the main, if not the only, tree of value in the forests. It was the premier lumber tree, and for years held first place as lumber-producer both as to quantity cut and the value of the product.

Millions Bushel Elevator At Coast
A contract has been awarded for the construction of a million bushel grain elevator for the Fraser River Elevator Company on the Fraser River near West Westminster, B.C. The elevator will be located on the south side of the river on a spot owned by the Canadian National Railway. The contract price is \$450,000.

LARGER EQUIPMENT REDUCES FARM LABOR

Farmers Should Keep This In Mind When Replacing Implements

The economic use of farm labor is essential to profitable farming. Labor is often needlessly wasted because farmers have not calculated the hours of manual labor that they could save by using, on farms having a sufficient acreage, implements drawn by three or four horses instead of two, says an Experimental Farms Note.

In many cases the time of a man could be saved by using, for example, a two or three-furrow plough, multi-section harrows, or a double cultivator. For the cutting and hauling of hay or grain, much labor could be economized through the use of larger implements, as these implements are ordinarily used during several days each year.

On a 200 acre farm where a 5-year rotation is followed and of which 15 acres are seeded to corn or other hood crops, 65 acres to grain and 80 acres to hay, an average of 800 to 850 hours of man labor equal to 80 to 85 ten hour days can be saved yearly solely through the use of more powerful implements.

The labor which is saved could be used for other lines of work which are often neglected because of the lack of time, or the tilled area might be extended and the increase the farmer's income. In most cases it would not be necessary to increase the number of horses on the farm for such a change.

It is readily understood that the farmer who already owns a complete set of agricultural equipment is not ready to sell it as a whole in order to buy larger implements, but he gradually replaces his equipment, he would be wise to consider the advantage of buying, even at an increased cost, three or four-horse rather than two-horse machines.

A Dual Source Of Wealth
Coal Mines and Clay Deposits In Southern Saskatchewan

A new coal mine has been opened up recently in the Estevan district, southern Saskatchewan. The mine is several feet deep and carries an overburden of valuable commercial clay. The mine is being operated by a force of practical miners, and the coal retails at \$3 per ton to local farmers who haul it from the pit. Clays from twenty-two different points in Southern Saskatchewan are now being tested at the laboratories of the provincial university to determine their suitability for the manufacture of whiteware. This classification includes such products as household ware, electrical porcelain and floor and wall tile.

Gold production from the mines of Northern Ontario in 1927 totaled \$3,409,217, an increase of \$2,000,444 over 1926. The Province of Ontario is now the principal gold-producing province in Canada, with British Columbia next in importance. A small quantity is produced in Nova Scotia.

It's twice as easy to decide one's mother as it is any other person.

You can stretch your word far without breaking it.

ROYAL GIFT TO CANADA

The highest peak in the Canadian Rockies is Mount Robson, in British Columbia, on the line of the Canadian National Railway. This mountain has an elevation of 12,972 feet above sea-level.

Highest Peak In Canadian Rockies
The highest peak in the Canadian Rockies is Mount Robson, in British Columbia, on the line of the Canadian National Railway. This mountain has an elevation of 12,972 feet above sea-level.

Helping the Farmer In B.C.
Press dispatches state that federal farm loan benefits are to be extended to British Columbia by legislation introduced in the provincial assembly on the recommendation of the agricultural committee. Loans will be obtainable on mortgage up to fifty per cent of appraised value of land and twenty per cent on buildings.

Served Eighty-Two Years
After serving 82 years with the same firm, John Hughes has just resigned as general works manager of George Satter & Co., manufacturers of weighing machines, at West Vancouver, B.C. He started with the firm at nine as an errand boy and served continuously until ill-health caused his resignation.

Care Of Breeding Turkeys

Important To Commence Feeding For Egg Production At The Right Time

To get turkeys laying at the proper season requires experience. It is important to know just when to begin feeding for egg production. According to a Dominion Department of Agriculture bulletin on the "Care and Management of Turkeys," forcing for laying should be begun as soon as the weather becomes really springing and laying should commence about the middle of April in Atlantic Canada and somewhat sooner in the West, especially in British Columbia. Eggs laid too early have to be held too long before setting.

When the spring feeding starts the breeding turkeys should be given grain twice daily, morning and evening, and at noon a feed of wet mash composed of equal parts of bran, shorts, ground oats and cornmeal with some skim-milk to moisten. Only the quantity that the birds will clean up readily should be given at each feeding. The noon mash should be started about a week later than the other feeds of grain. It is assumed that the turkeys have received only one feed of grain daily during the winter. Oat and ryeber should, of course, always be available.

Interesting Hatching Results Obtained At Agassiz Experimental Farm

At the Experimental Farm at Agassiz, B.C., where so many world's records were made with high producing hens in 1926, some interesting hatching results were obtained in the spring of that year. They are detailed in the latest report of the superintendent, available at the Publications Branch of the Department of Agriculture at Ottawa, and, of course, apply mainly to conditions in British Columbia. Hatching commenced towards the end of February and was continued to the end of April. The percentage of fertility during March was 91.2 and in April 81.6. Of the total eggs set during March 41.6 per cent hatched as compared with 41.4 per cent in April. Of the total eggs set during April 45.8 per cent hatched compared with a 50.2 per cent hatch in April. Hen eggs were 72 per cent fertile against a fertility of 72 per cent in pullet eggs. The number of chicks alive when wing-banded was \$3.6 per set, from hen eggs and \$3.1 per set, from pullet eggs.

Fame Of The Dominion As An Ideal Vacation Land Has Been Spread Far And Wide

Much has been said in recent years relative to the variety and extent of Canada's recreational resources. The annual national income derived from such resources, although hard to estimate accurately, is one which compares favorably with the annual value of the products of her forests, of her mines, fisheries or any other industry. In addition to keeping abreast with other progressive countries in the field of commercial activities, Canada has established a world-wide reputation as being a charming holiday land where practically all forms of recreation are available at moderate cost to the visitor. There are few records in the annals of Canadian development more interesting or more remarkable than those of the manner in which the economic importance of the Dominion's recreational features has grown in recent years.

Not the least among the many changes in the conditions of modern life are those resulting from the development of the automobile as a means of transportation. An amazing increase in the volume of holiday travel has been witnessed during the last few years and the automobile has played a large part in this regard; it is no longer considered a luxury of the rich but is rapidly becoming a necessity for the man in moderate circumstances.

Some idea of the extraordinary growth of the holiday traffic may be gained from a comparison of the records of touring automobiles entering Canada during a period of years. Between 1919 and 1926 the number of cars receiving permits to enter the Dominion for a period of 30 days rose from 100 to 500,000 and those entering for twenty-four hours increased from 177,000 to over 1,000,000. The number entering for a period of one to six months also shows a substantial increase. Aside from the remarkable increase of popularity of the motor and steamship lines each year add enormous numbers to the thousands who holiday in Canada. Including an even wider field of the automobile these organizations have spread the Dominion's fame as an ideal vacation land far and wide.

The vast numbers who annually visit Canada by automobile can find an opportunity to spend part or all of their vacation in territory extending beyond the usual avenues for travel. In keeping with the desire of many who wish to visit new fields and in order to provide facilities for easy and convenient travel, motor highways have been constructed which now enable the tourist to reach beautiful lake-land country, in some instances rarely explored. There are now over 150,000 miles of improved roads in Canada. In addition to this vast mileage, which is kept in good condition throughout the touring season and in season for the use of the motorist, there are many thousands of miles of other roads quite suitable for general motor travel. Leading to practically all places of interest in the populated areas of the Dominion these motor roads contribute largely toward the development of her recreational resources.

Few countries in the world possess such magnificent and diversified natural scenery or such inviting summer and winter vacation areas as Canada. Fortunately for the inhabitants of the large cities of America nature has bountifully provided immense playgrounds in her wide expanses of mountain, lake-land, forest and river. National and Provincial parks covering an area in the neighborhood of 29,000 square miles and ranging from the Atlantic seaboard to the Pacific coast are all easily accessible either by rail or motor road or both and provide the tourist with exceptional opportunities for varied recreation. The hutsman, fisherman, camper or canoeist will find in Canada's hinterland great stretches of game-forest, rolling plain, and mountain range, the natural haunt of moose, deer, caribou, bear, bighorn sheep, mountain goat and other native game animals; beautiful lakes and countless swift-flowing rivers affording an opportunity for some of the very best fishing to be found anywhere in the world.

From a historical viewpoint Canada occupies a unique position among the countries of the world, some of the most romantic and interesting episodes in the history of North America afford an extensive field for study and contemplation. There still remain, in many districts throughout Canada, vivid evidence of early conflict and ruin which have been preserved; and

there may be found original forts, blockhouses, powder magazines, guard houses and listening posts as well as other evidences of early important events which have direct bearing on the political, economic and industrial progress of the country.

Fishing lists amount the longest and most varied of the attractions found from coast to coast and from the International Boundary to beyond the Arctic circle, there is every reason to view that the natural assets which have been indicated above will prove to be one of the major forces of Canadian development in the future.

Helping the Farmer In B.C.
Press dispatches state that federal farm loan benefits are to be extended to British Columbia by legislation introduced in the provincial assembly on the recommendation of the agricultural committee. Loans will be obtainable on mortgage up to fifty per cent of appraised value of land and twenty per cent on buildings.

Served Eighty-Two Years
After serving 82 years with the same firm, John Hughes has just resigned as general works manager of George Satter & Co., manufacturers of weighing machines, at West Vancouver, B.C. He started with the firm at nine as an errand boy and served continuously until ill-health caused his resignation.

The summer descendants of a single fly will number 2,089,000.

"You need a cashier? You had one a week ago."

"Yes, I was working him also."

POES are quickly Soothed & Healed by Zam-Buk

WORLD HAPPENINGS BRIEFLY TOLD

Canadian farm lands in occupation in 1927 are valued at an average of \$38 per acre in a Government crop report just issued.

The Winnipeg Presbytery of the United Church has adopted a resolution in favor of the ordination of women to the ministry.

Jose Coure Joseph Legere, a Frenchman, accused of being a German spy during the Great War, was found guilty at Paris, and sentenced to life imprisonment in a fortress.

The Washington government appears unfavorable to any proposal for another conference of the great powers on naval disarmament before 1931.

Frederic Truchaut brought a bill down in the Quebec legislative assembly which would grant municipalities the right to prohibit news-stands advertising alcoholic liquor.

That the Canadian National Railway would, in the near future, purchase the Western Union Telegraph lines in the Maritime provinces, and add them to their own system, was the report current in Montreal.

Hon. C. M. Wilford, former Minister of Justice and leader of the New Zealand Liberal Party, arrived in Vancouver aboard the liner Aorangi, to make a study of Canadian conditions generally.

A. L. Joffe, chief commissioner of immigration, has left Ottawa for Great Britain to investigate the complaints which have come to the department in regard to the new medical inspection service. Mr. Joffe will be gone several weeks.

The population of Saskatchewan, as at June 1, 1926, was 820,728, an increase in the Quebec legislative assembly which would grant municipalities the right to prohibit news-stands advertising alcoholic liquor.

Sores Throats Before H.—There are many who have been afflicted with sores and have tried many ways with Dr. Thomas' Eucalypti Oil. All ailments troubled almost less than in applying this splendid remedy, as there is nothing like it to be had. It is cheap, but its price is in no way expressed by its low price.

U.S. Tariff Against

Canadian Cream

Increase Of Fifty Per Cent. May Go Into Effect

"The United States tariff increase of 50 per cent, or perhaps less, against Canadian milk and cream will likely go into effect," said a representative of Montreal, just back from Washington, where he represented the National Dairy Council of Canada at the United States tariff commission hearing regarding dairy products.

Mr. Armstrong stated that the methods used by the investigators of the commission in making comparative cost studies were not correct as regards Canada, and that he was resentful against remarks made by some of the speakers at the hearing to the effect that the standard of living among Canadian farmers was not up to that of the United States farmer.

The Least Excitement Made Her Heart Palpitate and Flutter

Mrs. Ambrose Owen, Elizabethtown, Ont., writes: "I suffered for some time with a bad heart, with some times controlled by my nerves. The least little excitement would cause it to flutter and palpitate, and I have been unable to have any sleep. I suffered in this way for some time when, one day, I saw

advertisements, so decided to try them. I had only taken a few boxes when I felt better, so I continued taking them, and in a few days my heart was entirely different."

Mrs. Owen, a lady at all drug stores and dealers, or mailed direct on receipt of price by The J. M. Milburn Co., Limited, Toronto, Ont.

W. N. U. 1724

Population Of Saskatchewan

Given As 820,728 As At June 1st, 1926

The population of Saskatchewan as at June 1, 1926, was 820,728, an increase in the five-year period from 63,228, according to the report issued by the Dominion Bureau of Statistics today. In this total, males exceeded females by 72,134. The rural population of the province was more than double the urban, the figures being 578,200 and 242,528 respectively. The urban population was distributed among seven cities, 80 towns and 260 villages.

Nearly 15 per cent. of the population was born within the province itself, while of the 820,728 persons in Saskatchewan, 621,448 were of British origin. Native-born Canadians comprised 525,372; those from the British Isles 180,411, and from other British possessions, 1,600.

Of the foreign-born citizens, numbering 186,190, or nearly 24 per cent., Russia was the largest contributor with 57,247. They were second with 11,594, and Ukrainians third with 10,607. The province had 8,284 Danes, 7,356 Germans, 8,240 Norwegians, 7,282 Swedes, and 2,908 Poles. There were 3,135 Alsatians, of whom Chinese furnished 2,719 and Japanese 87.

Illiteracy was greatest among the foreign-born, there being 10.58 of the total over 10 years old without sufficient knowledge of English to read, 2.93, and British-born, 21.

The Sun Life

More Fully Established On A Sound Financial Basis Than Ever Before

One of the most encouraging signs of the times for Canada is the substantial progress that continues to be made by our great banking and insurance institutions. The Sun Life Assurance Company of Canada has done record business during the past year, and its position is today more firmly established upon a sound financial basis than ever before in its history.

When Canadians reflect upon the strength and solidity of their banks, and their insurance companies, the desire that these shall always remain Canadian is uppermost. It is in the highest interest of the nation that they should never pass under foreign control. Canada needs capital, but not to be devoted to swamping our national identity. —Montreal Star.

Question: Why is emulsified cod-liver-oil wonderful for foot-ache in young girls and women?

Answer: Because it abounds in nourishing factors that are particularly beneficial to people prone to anemia and other conditions due to malnutrition.

Keep your system vitamin-nourished—take

SCOTT'S EMULSION

Invention Of Canadian

Control Device For Airplanes Declared To Be "Food Power"

A variable pitch propeller, which is to an airplane what a gear shift is to the automobile, will be introduced to commercial aviation in the U.S. this year if the plans of W. H. Turnbull, Canadian inventor, are successful. Mr. Turnbull, who lives in Rossmore, N.B., but who is staying at East Orange, N.J., talked to New York papers.

The device has been tested thoroughly by the Royal Canadian Air Force, he said.

Mr. Turnbull is negotiating with New York manufacturers for the national rights to his invention which is covered by patents and patent applications.

One method of varying the pitch of a propeller is to control the necessary gears by a small electric motor and a Turnbull which makes the device "food power."

Turnbull, who has been working on his propeller twelve years, said the pitch could be changed from positive angles to negative angles so that the motor actually would back up, a feature of great value on airplanes. Mr. Turnbull says his propeller will add 10 to 100 per cent. to the climb of an airplane, thereby making it possible for commercial planes to carry less fuel and more payload with greater safety and save 20 to 25 per cent. in fuel in long flights.

Diamond Cuts Were Costly

Replacing Three Plate Glass Windows Cost \$1,500

Three of the largest plate-glass windows in England are to be replaced along the Oxford Street frontage of Messrs. Peter Robinson, Ltd.

The windows, with two others of smaller size, have been shodded with a diamond, and in some places the 'tin' thick glass was cut completely through.

"It has become necessary to replace the windows," says an official of the Employers' Liability Insurance Corporation.

"Owing to the police regulations the week-end is the only time the windows can be taken to fashion. There are three of the windows to be filled are the largest in England, each having a dimension of about 21 feet by 10 feet, and have had to be specially manufactured at a rough cost of £100 a pane.

Round World Race

By Six Newspapers

European Press Celebrating Centenary Of Jules Verne's Birth

A globe encircling race between representatives of six European newspapers, which will follow the route of Phileas Fogg in Jules Verne's "Around the World in Eighty Days," will be a striking feature of the 100th anniversary of the birth of the imaginative French author, who was born in Nantes, February 8, 1828.

The participants who started March 6, follow to choose their own means of transportation, but they must follow the route Paris to Brindisi, Suez, Bombay, Calcutta, Hong Kong, Yokohama, San Francisco, New York, Liverpool, London to Paris.

Pres. Coolidge May Visit Canada

Possibility That United States President May Be In Ottawa This Summer

The statement contained in a United States magazine that President Coolidge may visit Ottawa this summer as a return courtesy for the visit of the Governor-General to Washington last fall, has aroused considerable speculation in Ottawa, says the Journal, in a news page story. It states that the president may hit the corner stone of the United States Legation in Ottawa. It adds: "There has been no announcement from Washington concerning the president's plans, but it is believed in Ottawa that if he visits the Canadian capital, he will come during the summer."

Only one president of the United States has visited Canada during his term of office. Warren G. Harding, it was recalled, stopped at Vancouver shortly before his death."

Aviators Helped Motorists

Unusual Story Vouched For By Two St. Paul Men

If your automobile stalls, hail a aeroplane to pull you out. That's the story two Wisconsin men told. The story is vouched for by Gene Shanks and Paul Trellette, of St. Paul.

Dr. H. H. Holm and S. J. Villan, of Milwaukee, were crossing the lake on Lake Pepin, near Stockholm, Wis., when their automobile broke down at a shallow place.

A short time later a plane, carrying the two airmen, passed overhead. The aviators were attracted by the two men waving their arms and the plane descended to the lake.

The airmen obligingly hooked up the plane from the plane's tail and to the automobile, and pulled the machine out. They hopped off again and related their story when they arrived at St. Paul.

Recipes For This Week

(By Betty Barclay)

WINTER CHOCOPUD

2 cups milk.
4 tablespoons cornstarch.
1/2 cup sugar.
1/2 square chocolate.
1/2 teaspoon vanilla.
1/2 teaspoon salt.

Mix dry ingredients, make into a batter with a little milk. Add to heated milk in top of double boiler. Add melted chocolate. Stir to prevent curdling. Cook 20 minutes. Add vanilla and pour into molds lined with paper. Chill, serve with cream or whipped cream.

PUT-FAIRLS

1 egg white.
1 orange.
1 cup powdered sugar.
The Peel small oranges, removing white membrane with outer skin. Beat egg white, slightly, using wire whisk. Add sugar, gradually, and beat until beating until meringue is stiff and will hold its shape. Thrust a long slender wire skewer through the center of the orange, and insert completely with the meringue, and suspend them, by the skewers, across a narrow pan, and bake twelve minutes in a slow oven, being careful not to let them brown. Twist skewers gently to remove them. These oranges make a pretty dessert or supper dish.

Testing Paper With Radio

Latest Use Was Accidentally Discovers By Radio Fan

One of the latest uses for radio is the testing of manufactured paper. It was disclosed at the annual paper and pulp convention held in New York.

A radio apparatus on paper machines, W. D. Souverville of Bangor, Me., explained, is used in his mills to test both weight and amount of moisture in the paper.

The instrument was evolved from an accident which occurred when a radio fan, who, in using paper, threw his set out of tune, learned that the thickness of paper and the amount of moisture had varying effects on his dial.

Art Is Dying Out

"Art is dying out, an art which is fast dying out, and only one hand-cutter, it is claimed, now plays his trade in London. He has been working for just over twenty years. When a press reporter visited him he picked up a chopper the size of a meat ax and with it peeled a piece of cork as fine as an apple rind. "It is as easy as cutting butter," he said. He showed the reporter a picture which he had made, in cork, of Arundel Castle, Sussex.

Standard Of Safety High

Comparison Between First Railroads and Modern Airplanes Is Interesting

Considering the short history of aviation, the standard of safety today is very high. Two reports from England, one this year, the other eighty-five years ago, offer an interesting comparison of the safety of the development as begun with the airplane. According to a recent annual report of the Imperial Airways Ltd., carried 520 passengers over 2,000 miles in 1927 without injury to a single passenger.

On December 14, 1842, the London Times stated: "The number of passengers carried on the eight railway lines numbered 10,508, the distance 1,562,338 miles yearly. In this time only fifty-six passengers were injured, of whom twenty-two were killed."

It was General

Pat Murphy was taking his first flight in an airplane. The pilot was taking him over New York City. When they were about three thousand feet the plane suddenly went into a steep climb. "His hat," laughing and shouting, about a "fifty per cent. of the people down there thought we were falling." "Sure," he roared, "and fifty per cent. of the people up here thought so, too."

The province of Alberta now has a main highway system extending over 2,500 miles and a secondary road system of 11,000 miles, a large percentage of which is standard grade roads.

SUNDAY SCHOOL LESSON

MARCH 18

JESUS TEACHES SINCERITY

Golden Text: "Keep thy heart with all diligence; for out of it are the issues of life."—Proverbs 23:7.

Lesson: Mark 7:21-23.

Devotional Reading: Psalm 21:1-6.

Explanations and Comments

1. "The Tradition Of The Elders Violated By The Disciples, verses 1-5." Certain Pharisees and Scribes had come from Jerusalem for the express purpose, no doubt, of obtaining evidence which they could use against Jesus. They noted that the disciples ate food without first washing their hands, and one day they gathered about Jesus and asked him if it was that his disciples failed to follow the tradition of the elders, for they ate with hands defiled, ceremonially unclean because unwashed.

For the benefit of his Gentile readers, who were not familiar with Jewish customs Mark here in verses three and four gives parenthetically an explanation. Before eating the Jews washed their hands diligently (up to the elbow, Revised Version). This was not because the hands were actually unclean, but because they were ceremonially unclean. When they came from the market place, where they would come in contact with people whose feet were regarded as ceremonially unclean, they bathed before eating. This was kept alive all the regulations as to the washing of cups and pots and brazen vessels.

The Pharisees and Scribes, the "tradition of the elders," Dr. Charles H. Johnson remarks, "were a group of men who were allowed the most meagre amount of bread and water for their bodies, and who were not permitted for bathing his hands instead of washing them, that he had a disease that transgresses the institutions of God."

"Fascination is easily awakened in the defense of Tradition. In the Church of the Pharisees the ecclesiastical regulations, e.g., the Fasts and Sabbaths, and the ceremonial of the Law and the monastic vows, are enforced with a greater severity than the original religion of the Pharisees. The Roman Church, accepting the Pharisee tradition, has regarded the precepts of men into doctrines to such a degree that the New Testament is regarded as a dangerous heresy. A passage like the one before published is a revelation of Roman teaching."—R. P. Horton.

Brushing Work on H.B. Road

Good Progress Has Been Made During the Winter Months

Work has been prosecuted all winter on the railway now under construction from the Hudson Bay Railway to the Finlay River in Northern Manitoba, and railways have been laid for a distance of thirty-five miles. It is stated that the survey of this line will be continued in the spring.

Cold Lake, a distance of twenty-five miles beyond the Finlay River, with the intention of extending the road to that point. The line to Finlay River is to be completed for operation by December 31. Work on the Hudson Bay Railway from Limestone to Fort Churchill has also been carried on during the winter, and good progress has been made in clearing the right-of-way and getting the rails in shape for an early start by the graders. Work on the harbor at Churchill has also been going on all winter, so that there will be no winter docking accommodation for ships by the time the railway has been completed.

ALBERTA WOMAN WINS SCHOLARSHIP

Member of University Of Alberta Teaching Staff Is Active Botanist

Miss E. Silver Dowling, B.A. M.Sc., a lecturer in botany, University of Alberta, Edmonton, is the winner of the \$1,200 scholarship offered by the Dominion Federation of University Women.

Annually the federation arranges to present a scholarship to the woman applicant whose accomplishment and abilities indicate that she would make the best possible use of the scholarship. Miss Dowling continues her post-graduate studies for a year.

Miss Dowling received her high school education at Calgary, later went to Edmonton, where she attended university. She has been a member of the teaching staff of the University of Alberta for four years, and is regarded by many as one of the most active of the younger Canadian botanists. She has published a substantial number of articles on botanical subjects and in the last six years has carried on observation work in Alberta and B.C.

From the National Research Council Miss Dowling was given a grant of \$1,200 to aid in the study of the trees and vegetation in small areas. The Royal Society, London, supplemented the grant. Her discovery of the "silver birch" in the north of Alberta is being put into form for publication.

To carry on her botanical studies at University College, London, is Miss Dowling's desire, and to prepare her thesis for a Ph.D. degree.

GIVES NO CREDIT TO GOVERNMENT FOR C.N. SUCCESS

Ottawa.—Hon. Hugh Guthrie, House leader of the Conservative opposition last session, charged the minister and the minister's party with "special pleading" in their eagerness to take in the reflected glory of the president of the Canadian National, Mr. Guthrie declared. He thought Sir Henry and the board of management of the Canadian National should be congratulated upon the "special pleading" they had made during the past year. Not earnings of the Canadian National had increased by \$125,000,000, in four years—\$125,000,000 which formerly had to be withdrawn from the treasury of the Dominion. "The government," Mr. Guthrie pursued, "was not entitled to a particle of credit, Sir Henry Thornton and the board were entitled to the full credit for the result obtained."

Also speaking on the budget, W. P. Liles (U.E.A., Camrose), described the 1926 census in western Canada as startling. "The prairie provinces had lost the whole of their natural increase in population as well as 28 per cent. of the new immigration since 1921. This meant ten million dollars spent annually on immigration by federal and provincial authorities and the railways." He referred the speech of Mr. Guthrie as one of the finest eulogies of the Liberal party that had been delivered. He declared that the system of book-keeping whereby Canadian National expenditures to the point upon which interest is being paid are not added to the net debt was instituted by the Conservatives. He believed that it was a proper system, and that it had been adopted by the Liberal Government.

Mr. Cahill believed that if a referendum was taken in Canada on the best fuel policy, that 70 per cent. of the people would favor reduced taxes on oil or free trade. He declared himself not to be designed so as to favor any special class.

Weekly Newspaper Men Meet

Hon. Chas. Dunning Speaks At Banquet In Connection With "Director's" Meeting At Ottawa.

Ottawa.—The annual meeting of the directors of the Canadian Weekly Newspapers' Association was held in the Chateau Laurier, with full representation of the provinces. Business of urgent importance was under consideration. A banquet was tendered by S. N. Wyne, Hon. C. A. Dunning and Geo. McPhee were invited to the meeting. The meeting was held in the Chateau Laurier, with full representation of the provinces. Business of urgent importance was under consideration. A banquet was tendered by S. N. Wyne, Hon. C. A. Dunning and Geo. McPhee were invited to the meeting. The meeting was held in the Chateau Laurier, with full representation of the provinces. Business of urgent importance was under consideration. Woman Liberal Elected In Britain

Mrs. Walter Runciman Successful Candidate In St. Ives.

Preston, Eng.—The Liberal woman Liberal in the present British Parliament and the first husband and wife combination in the House of Commons were re-elected from the recent by-election in Saint Ives.

Mrs. Walter Runciman, wife of the Liberal member for Haverhill, West, not only became the first woman Liberal in the present House, but succeeded in capturing the St. Ives constituency from the Conservatives.

The district formerly was a Liberal stronghold, but returned a Conservative at the last general election in 1924.

Mr. Runciman, who is a prominent figure in the Liberal party, actively supported his wife's candidacy.

Pioneer Missionary Dead
Winipeg, Nev. Dr. John MacLean, historian and pioneer missionary of Western Canada, died last evening at his home in Winipeg, Nev. He was 77 years of age, and had been in Canada more than 50 years.

He had been prominently connected with the activities of the Methodist Church in the Dominion.

Saskatchewan House

Prorogues

Thirty Bills Were Put Through In Final Session

Regina.—With traditional dignity and solemnity His Honor Lieutenant-Governor Neveland presided at the third session of the sixth Saskatchewan Legislative Assembly. Since January 24, thirty-three sittings were held during the session, including 11 night sittings, four morning sittings and a Saturday sitting.

The closing ceremony came after a long busy day during which more than 30 bills were put through the House and again as how the money was spent. An item of \$11,500 was required for the Power Commission's work. The main items included \$55,000 for the Treasury including a grant of \$10,000 to the Canadian National Institute for the Blind, and \$25,388 for Freight Rates Inquiry, \$50,000 for the Farm Loans Board, \$195,000 for the Educational Department, \$52,200 for the public health department, \$18,900 to provide \$3,000 for leaders of the Opposition and to give the Premier an increase of salary from \$18,000 to \$20,000 per annum. These items were discussed a year or two ago when it was pointed out that Saskatchewan members were the lowest paid in the Dominion.

At the bedside of little Princess Six Months' Old Daughter Of Emperor Hirohito

Tokyo, Japan.—The six months old daughter of Emperor Hirohito of Japan, is dead. "Complications following influenza," was assigned as the cause of the death of the Imperial baby, who had been critically ill for several days.

The child was originally attacked by influenza, from which the emperor himself also suffered, together with thousands of Japanese people. It was announced that the emperor was convalescent.

At the bedside of little Princess Six Months' Old Daughter Of Emperor Hirohito of Japan, is dead. "Complications following influenza," was assigned as the cause of the death of the Imperial baby, who had been critically ill for several days.

New Discovery At Flu Flou

Another Ore Body Located Said To Be Of Great Importance

Toronto.—Reports from Flu Flou Mines are that a new ore body has been located south of the main ore body. It is stated that the new ore is of considerable importance.

Development work is being pushed forward energetically. On the 600-foot level a concrete 240 feet in width has been drilled on for a length of approximately 300 feet. The average value obtained has been 2 per cent. copper and some zinc, but some sections are of much higher grade, one of 24 per cent with running between 5 and 6 per cent. copper.

The work of preparing a new townsite is well under way, and sites have been selected for the concentration and smelter. The present camp buildings will be removed to make room for the new plant.

Stellar People Minded

Edmonton.—Following one of the stormiest passages that any measure before the Alberta House has been accorded in recent years, the Sexual Sterilization Bill was given third reading and will be put into effect as soon as it has been assented to by the Lieutenant-Governor. By this action of the legislature, Alberta becomes the first province in the Dominion to Canada to undertake sterilization of the feeble-minded.

Gift For Medical Research

Stockholm.—At the request of the monarch himself, Sweden's birthday gift to King Gustav V. will be devoted to work for suppression of cancer. A national subscription for the fund in honor of the king's 70th birthday, which has been accepted in advance, on the promise that the money be used for cancer research.

Boy Inherits Millions

Young Son Of New York Millionaire Receives Legacy

New York.—A five-year-old boy today had joined the ranks of American millionaires. John Mortimer Coward, 3rd, of Glenridge, N.Y., is to receive at least two-thirds of the \$4,000,000 estate of his father, J. Mortimer Coward, late head of the Coward shoe business, who died in Havana recently.

Part of the fortune which the five-year-old boy inherits is \$1,000,000 from an insurance company, policy his father took out last July. Mr. Coward was 28 years old.

SITUATION IN THE NEAR EAST LOOKS OMINOUS

London.—The stern note which Great Britain pressed to Egypt yesterday in effect that the British will not grant full independence to that country at present has been copied into the "Daily Mail" in order to create a situation which may affect British relations throughout the Near East to the borders of India.

Despatches from Egypt assert that the political situation there is fraught with confusion, uncertainty, and excitement. Egypt is without a cabinet but the Nationalist leader, Nahaas Pasha, after an hour's audience with King Fuad, declared that constitutional governments would be formed as long as the constitution exists.

The British note, which apparently dropped like a bombshell in Cairo political circles after the breakdown of negotiations for an Anglo-Egyptian alliance, makes it clear that the Nile country that Great Britain will not tolerate any legislation that is likely to hinder British power in protecting foreign life and property in Egypt.

The note reveals that the British Government has for some time feared that such legislation would be introduced by the Egyptian parliament. But so long as there was prospect of a treaty of alliance, British refrained from expressing their fears.

Well informed British observers believe that the home government now has said his final word and that the burden of the next move in the imbroglio rests in Egypt. Shorn of diplomatic verbiage, the position is about as follows:

Egypt declines to sign any treaty of alliance which does not accord absolute independence to her. She rejects the right of Great Britain to maintain troops in Egypt or to have any control over the Egyptian police. Britain, on the other hand, firmly intends to keep her troops there, believing the soldiers are necessary for protection of the Suez Canal. She also insists on maintaining a measure of control over the Egyptian police and observers explain that this is to prevent any situation arising which might result in the Egyptian people taking a hand in Egyptian affairs.

Whether Egypt signs such a treaty or not, Great Britain will stick to these demands, in the opinion of British observers.

Eight Destructive Insects

Ottawa.—The fight against the destructive insects which prey upon Canadian crops was described by Arthur Gibson, Dominion entomologist, to the convention of the Canadian Horticultural Council here. The use of the aeroplane for dusting in an endeavor to rid the crops and soil of certain insects was experimented in last year and proved quite promising.

Pictures Cannot Be Shown

Photos Of Lieut.-Col. Amery's Tour Will Not Be Exhibited

London.—In connection with the recent Empire tour of Lieut.-Col. C. M. Amery, secretary of state for Dominions Affairs, photographs of various places and interesting incidents were taken by Captain William Brown, M.P., former private parliamentary secretary to the Minister of Health and the Chancellor of the Exchequer, who accompanied Col. Amery on the tour. It was proposed to exhibit the pictures within the precincts of the House of Commons.

Australian Rugby Team Here

Nothing but praise for the sportsmanship of Old Country people was expressed by the Waratahs, New South Wales Australian Rugby Team, when they arrived in Canada recently on the Canadian Pacific Steamship Melita. During their nine months' tour of Great Britain and France, where they played 33 games with record crowds in attendance, some figures exceeding fifty thousand, they

much appreciated the sportsmanship behavior of spectators.

E. Gordon Shaw, manager of the team, said: "The British crowds were about the most fair-minded and unprejudiced I have ever seen. In a rare case ever gave a decision that was perhaps a shade on the doubtful side in our favor, there were never any demonstrations of disapproval. I have nothing but unstinted admiration for the whole-hearted sportsmanship of our treatment on the other side."

Daring Aviators Return To Safety

Flight Wreck Was Undamaged

London.—Eight passengers of an aeroplane flying from Paris to London had a remarkable escape when the machine crashed in a field near the Lympne aerodrome in Kent. Baroness Van Tull Canach Kavanagh, of the Lympne Aerodrome, was one of the eight passengers were uninjured.

Trouble was experienced when the plane crashed in the Lympne aerodrome. The left wing suddenly dipped, and the plane spiraled rapidly toward the earth. It crashed and bounced several times after the wing struck the ground. The passengers were jolted all over the place and the baggage tumbled about.

Unconcerned, the pilot, Roger Maury, climbed out of the cockpit, opened the passenger door, and all scrambled to safety, fearing the machine might catch fire as both engines were wrecked.

Later Miss Maury explained that a valve spring in one of the engines had apparently broken.

Banking System Discussed

Government Inspector Says Nothing Wrong With Present System

Ottawa.—C. R. R. Tompkins, government inspector general of banks, spoke before the House of Commons committee on banking and commerce and submitted to question by the members. The banking system, as it existed, met the needs of the country, he told the committee. Of course, from time to time changes were necessary but he could not see anything radically wrong with the system.

The views of the Canadian Council of Agriculture with respect to banks and banking were presented by A. E. Darby, director of economic research for the council.

Government Bill Criticized

One Day's Rest In Seven Bill Does Not Please Manitoba Laborites

Winipeg.—Though it was given second reading in the British Government's bill for one day's rest in seven for certain employees was severely criticized by the Manitoba Labor and Conservative leaders in the legislature.

"Under the bill," declared John Quinn, Labor leader, the bill only applied to employees already getting one day's rest in seven. Mr. Green described the bill as "a bluff" of the House of Commons.

"The bill," said Mr. Quinn, "applied to employees already getting one day's rest in seven. It was a bluff, and though there were none in the province, why not, on the same principle, apply it to shipbuilding, the building of dreamships and submarines? Let us have a real act, when we are at it."

Pictures Cannot Be Shown

Photos Of Lieut.-Col. Amery's Tour Will Not Be Exhibited

London.—In connection with the recent Empire tour of Lieut.-Col. C. M. Amery, secretary of state for Dominions Affairs, photographs of various places and interesting incidents were taken by Captain William Brown, M.P., former private parliamentary secretary to the Minister of Health and the Chancellor of the Exchequer, who accompanied Col. Amery on the tour. It was proposed to exhibit the pictures within the precincts of the House of Commons.

Now, however, permission for the exhibition has been refused by the Lord Chamberlain, the Earl of Cromer, with whom the decision on the matter rests.

Escape Death When

Plane Crashes

Eight Passengers On London To Paris Flight Were Uninjured

London.—Eight passengers of an aeroplane flying from Paris to London had a remarkable escape when the machine crashed in a field near the Lympne aerodrome in Kent. Baroness Van Tull Canach Kavanagh, of the Lympne Aerodrome, was one of the eight passengers were uninjured.

Trouble was experienced when the plane crashed in the Lympne aerodrome. The left wing suddenly dipped, and the plane spiraled rapidly toward the earth. It crashed and bounced several times after the wing struck the ground. The passengers were jolted all over the place and the baggage tumbled about.

Ottawa.—C. R. R. Tompkins, government inspector general of banks, spoke before the House of Commons committee on banking and commerce and submitted to question by the members. The banking system, as it existed, met the needs of the country, he told the committee. Of course, from time to time changes were necessary but he could not see anything radically wrong with the system.

The views of the Canadian Council of Agriculture with respect to banks and banking were presented by A. E. Darby, director of economic research for the council.

REPORT TELLS OF SEARCH MADE FOR AVIATORS

Ottawa.—Beacon's turning on to spread the news of the accident, tragedy all over the North land, and officers of the Royal Canadian Air Force did all that was humanly possible to locate Flying Officer Lewis, Flight Sergeant Terry and the missing aviators.

In a lengthy report of steps taken to find the trio, Squadron-Leader T. A. Lawrence, of Ottawa, who has been in charge of the R.C.A.F. detachment in the north, detailed areas covered by aeroplane and dog team. Every inch of the vast territory was searched. Dog teams with Eskimos were sent out to establish camps of foot and supplies, and to visit Hudson's Bay posts and Eskimo villages that the airmen were missing.

Beacons were kept going from a high point behind the Port Burwell lighthouse at night. Flares and distress signals were fired off until this had to be suspended through shortage of fuel and flares.

Squadron Leader Lawrence tells of the part played by Flight-Lieutenant Brian Carr-Harris, Ottawa, and A. A. Leitch, Winnipeg, in the search, and, "great credit is due to men who have been in the north since the day of the disaster."

In official circles here it is believed the plane which the three men were forced to abandon will be washed up on the shores of Labrador or Newfoundland in due course, on the instruction of the Government to declare the area in which it was last seen as a search area.

It is believed the plane will be washed up on the shores of Labrador or Newfoundland in due course, on the instruction of the Government to declare the area in which it was last seen as a search area.

Want Holiday November 11

Ottawa.—"In view of the request of the Canadian Legion, is it the intention of the Government to declare November 11 (Armistice Day), a National Holiday?" asked J. J. Barbeau, member of the House of Commons, in the House of Commons. He was informed that the matter is still under consideration.

French Legation At Ottawa

Paris.—The finance committee of the Chamber of Deputies has approved an appropriation for the establishment of the French legation at Ottawa. In approving the appropriation, the committee decided the establishment of the French legation at Ottawa was valuable for both trade and sentimental reasons.

The domestic market absorbs annually \$87,500,000 worth of Canadian agricultural products as against \$75,000,000 worth of French products. The value of the per capita consumption of farm products in Canada amounts to \$87.50.

EQUAL SUFFRAGE IS PROMISED FOR BRITISH WOMEN

London.—Stanley Baldwin, the first British prime minister to appear at an equal suffrage meeting, promised a vast assembly of women representing 140 organizations that "in a few weeks" Parliament would grant them complete equality with men in voting privileges.

This declaration was received with frenzied cheering by the women, who had not to celebrate the success of their bitter fight extending over nearly 100 years.

"I have selected the home secretary to be the Joshua, who shall lead you into the promised land," said Premier Baldwin, indicating that Sir William Joynson-Hicks would have charge of the franchise bill.

Agreeing with Dorelli, who was one of the early statesmen to favor full rights of citizenship for women, the Prime Minister asserted that there were no grounds in logic, justice or expediency to withhold the franchise from one sex more than the other.

Mr. Baldwin announced that the franchise bill will be introduced in the House of Commons next Monday. It will pass its second reading before Easter, and will be completed at the earliest possible date.

Nine Chief Admits Laxity

Hollinger Disaster Due To Order Not Being Observed

Toronto.—Chief Justice Williams, Hollinger's general superintendent, admitted to the Royal Commission, investigating into the Hollinger disaster, that there was a "very bad slip" on his part in the transportation of the men, when his orders about disposal of powder house rubbish had been disregarded.

Instead of putting the rubbish in the waste paper or else mixed with the other rubbish, it had been put in the stoves without any racks, and as a result had started the fire which snuffed out the lives of 20 miners.

Williams could not say who was responsible. Williams said he knew of no one who could give further information when it was suggested the commission adjourn so that it might conduct an inquiry there.

Reward For Eskimo

Suggestion Made In Parliament That Recognition Be Given "Bobby"

Ottawa.—The House of Commons Government if it is willing to give consideration to the matter of rewarding in some form or other the Eskimo who saved the lives of the two airmen shot down by the Germans. As soon as the full report was received the whole matter of reward would be given consideration.

Championship Wolf Hunt

Toronto.—A championship wolf hunt, with \$10,000 in prize money, as a means of eliminating the animals which yearly take a heavy toll of livestock in the north country, was announced by T. Legault, Liberal, in the Ontario Legislature. The prize money, he suggested, might be divided into prizes ranging from \$5,000 down.

Five Canadians Go To U.S.

Toronto.—Indications that the number of Canadians leaving Ontario for the United States considerably increased in 1925 compared with the previous year are given in the report of the registrar-general, which has been presented to the legislature. A total of 10,000 to the number is shown.

French Legation At Ottawa

Paris.—The finance committee of the Chamber of Deputies has approved an appropriation for the establishment of the French legation at Ottawa. In approving the appropriation, the committee decided the establishment of the French legation at Ottawa was valuable for both trade and sentimental reasons.

The domestic market absorbs annually \$87,500,000 worth of Canadian agricultural products as against \$75,000,000 worth of French products. The value of the per capita consumption of farm products in Canada amounts to \$87.50.

Excursion To Sweden

Many Are Planning To Visit No-
Mane Lands On the Baltic Sea.
Rev. Oscar Gunnarfeldt, of Win-
nipeg, is organizing a special midsum-
mer excursion to Sweden, Norway,
Denmark and Finland, which is to
leave Winnipeg about May 14, by
the Canadian National Railway, and will
return from New York May 21, on the
A.S. Drottningholm. Already quite a
number of applications have been re-
ceived for reservations, and it is ex-
pected that a large party from West-
ern Canada and Minnesota and North
Dakota will take advantage of this
opportunity of visiting their native
lands on the Baltic sea.

Machine Preserves

Secretary Over Radio

New Method Has Been Tested and

Found Satisfactory

Secretary in voice transmission by
radio was successfully demonstrated
by the use of a combination of high
and low frequency transformers to
distort human speech and jumble it
to make it unintelligible to the human
ear.

The feat was accomplished in a

demonstration before a group of en-

gineers, scientists and business men

at the City Club, by Sergeant H. Grace,

commercial engineer of the

Bell Telephone Laboratories.

An electric translating "brain,"

which picked up the intentionally in-

terfering high and low frequencies,

rearranged them, in their proper

sequence, modulated them and sent

them through loud speakers in pro-

per relation, did the trick, and con-

vinced the audience that secret voice

transmission by this method is a

scientific fact.

Practical application of the device,

it is pointed out, would protect the

transatlantic long distance radio tele-

phone service from the ears of all ex-

cept those for whom it is intended.

At present the messages are trans-

mitted on a wave length so low that

few stations have apparatus which

can be tuned to pick it up. The new

device will assure secrecy under

all conditions.

Northern Saskatchewan

Development

Provincial Government Is Planning

To Aid Mineral Prospectors

The new department of industries

of the Saskatchewan Government is

planning to aid mineral prospectors

in the northern sections of the prov-

ince. In conjunction with the Dom-

inion Government, aerial surveys are

being continued, and it is hoped that

the whole north-eastern mineral area

will have been surveyed by the end of

next year. The department is getting

into the position whereby it can be

of every assistance to the prospector

and investor. At the present time

there is very little accurate informa-

tion of Saskatchewan's northern min-

eral areas. Recognizing that great

development can be looked for both

in these areas and the western min-

ing areas of Northern Manitoba, the

provincial department is speeding up

aerial mapping of the territory as

well as the plans for its own provin-

cial activities in the coming season.

The minister states it is the inten-

tion of his department to place its fac-

ilities at the disposal of the prospector

and the investor. "The mine will be

given every possible assistance," said

Mr. Spence, "at no cost to the provin-

ce. We will assist him through our experts

at the university and do everything pos-

sible to assist him in the position of de-

veloping any proposition which ap-

pears to have evidence of successful

working out. To the capitalist the

department will be prepared to offer

to assist in developing water powers

and coal fields and to co-operate in

every way."

Canada's Future

Canadians should take a big view of their country and its future. There
should be nothing minor nor small in their conception of the Dominion
present or future, but rather our vision should be broad, large and courageous.
The individual who persists in looking out on life through blue
spectacles, who can never see any possibility of success ahead because of
obstacles in the path, who is forever contrasting his inferior position with
that of a more successful neighbor, will be a failure. And what is true of the
individual is equally true of a nation.

The habit indulged in by some Canadians, both in public and private life,
of comparing Canada with its sixty years of history as a confederated unit
with the United States with its 150 years of union, and Canada with its ten
millions of people with the more than one hundred and ten millions in the
United States, is just as shortsighted as it would be for a merchant established
one year in business and with five employees to complain that his business
turn-over was not equal to that of another merchant with a business of
many years' standing and a staff of one hundred and fifty assistants.

Comparing Canada with the present United States gives the latter the
advantage, but the advantage is all with Canada when it is compared with the
United States at the same age or with an equal population. Even making full
and ample allowance for changed conditions resulting from science and
inventions, discoveries and advancements of all kinds, the contrast is dis-
tinctly and greatly in Canada's favor.

For example, it was not until the United States had a population of
seventy-five millions of people that its trade reached the figure which Canada
now enjoys with ten millions of population. When the United States had
a population only equal to that of Canada today, it did not cut much of a
world figure; it was not a leader in any department of world production or
commerce; rather it was engaged in the pioneer task of its own domestic
development, and it would have been just as reasonable to deride the United
States and its future then because it did not measure up to the other coun-
tries of Europe, and it was not a power in the world's great future because it
had not already attained to the stature of the United States.

Young in years and small in population, Canada is today a real factor in
world affairs. It has outstripped the United States and all other countries in
the manufacture of paper, and in the last two years has been even better. Can-
ada today finances itself to an extent the United States was not able to do
until it was many times its size.

Nowhere else in the world are there two nations living side by side,
speaking the same language, with the same monetary system, and having
similar customs and ideals. Yet there are people who profess surprise that
there is a constant exchange of population over our international boundary,
and that the larger and more powerful magnet of the United States
should attract the greater number. It would be against all reason and nature
if it were not so. Yet we make bold to predict that the day is not far
distant when Canada will surpass the more powerful magnet of the two,
population will flow from the United States into Canada in a greater and
more steady stream than has ever flowed southward.

Paradoxically, many of the very people who deplore any exodus of
Canadians to the United States, at the same time object to United States
people and capital coming to Canada because of a fear that Canada will thus
become Americanized. Others object to Canadian capital being invested in
the United States or other countries, claiming it should be kept at home for
investment and development purposes.

In all this is to be seen an attitude of doubt, of fear, a spirit of "little
Canadianism," expressive of an inability to stand on one's feet. It is an
attitude which, at all times, has inevitably retarded the self-assertion and
forward-looking glory of Canada out of the country. Such people would do
well to throw away their blue spectacles, and realize that Canada is on the
map of the progressive nations of the world to stay. They should become in-
volved in the considered opinion of the Prince of Wales who recently
declared: "Canada is on the threshold of one of the most astonishing eras
of expansion and development ever seen. Exactly how long that will take none
of us know, but certainly it will occur in the lifetime of many of us."

Seeking New Trade

Most of the imported staples that
Canadians buy come from the United
States. But our neighbors are not
satisfied and the U.S. Department of
Commerce is opening an agency in
Winnipeg for the promotion of the
sale of American goods in western
Canada, believing that until then that
hath, the trade shall be given.

CHAMPION CHATTER

VOL. 1

Thursday, Mar. 15, 1928

No. 5

Published in the interests of the People of Champion and Farmers of this vicinity.
GEO. L. DEPUÉ, Editor.

EDITORIAL

The southsayer who told Julius Caesar to "beware the Ides of March" was a pretty wise old bird for his day. But Caesar was only murdered and it was soon over with. Just supposing he'd had an Income Tax starting him in the face on the Ides of March. Then he WOULD have had something to worry about.

Our sympathy goes out to the lady who lost her dress last week.

Shades of St. Patrick! We hear they are selling a rattlesnake to Ireland for exhibition purposes.

We have unloaded 3 more catheads of the McCormick-Pesting tractor this week. Lots of power there!

"Good Equipment Makes a Good Farmer Better"

A long-legged sheep in Asia is able to run forty miles an hour and that's just about the kind of a lamb it would take to keep up to Mary these days.

Stetto Bros. and F. A. Alder have taken delivery of three 12-30 h. p. McCormick-Dearing Tractors this week.

Get out the green necktie.

St. Patrick's day is nigh. Good will has been defined as the thing that makes future business more than an accident.

Fred Clever says 'Home is a place where every man is a hero.'

Chas. McDougall left us an order this week for a McCormick-Dearing double disc, front seed delivery, drill.

Miss a Few Misses
She: "Is it true that sailors have a sweet heart in every port?"
Sailor: "Well, no. There were a few places."

we didn't touch on our cruise."

Mr. and Mrs. C. Davis, Mrs. G. F. Smith, H. E. Smith, Mrs. A. E. Coe and daughter, Dorothy, are winter tourists who have returned very recently.

Have you noticed the way the stores in Champion are spending up? Looks as if spring will soon be with us.

C. H. Sutton and A. Ruggles are recent purchasers of Copper Carbonate and Treaters. Charlie says it's the only method.

A man need not be as fleet as a deer to pass the buck.

ALBERTA

There is no objection to the reading of Mrs. Wise's papers on W. I. subjects at other points so long as they don't get wise to her angel cake. There is too big a home demand for this product to let any of it go away.

Owing to the appearance of two more cases of scarlet fever the schools were closed on Thursday until the first of the week, at least. All the patients are doing well.

The scenery is so largely devoted to tractors around town that there would be no difficulty in holding a tractor show that would make history in that connection.

Local and General

Mrs. W. J. Cain is visiting in Vulcan.

H. E. Gill is in Calgary on business bent.

Two cars of Autos arrived in town this week.

Mr. and Mrs. J. O. Bell were visitors to Calgary this week.

The Ladies' Aid will meet at the home of Mrs. Neil McLeod on Thursday, March 22nd.

FOUND—Ladies' dress between Frank Smith's and Oscar Simonson's. Apply at Chronicle office.

Threshers are looking forward to an early resumption of operations in the near future.

Never so many different kinds of thrills crammed into one picture before. See Tom Mix in "The Arizona Wildcat" next week.

Coming to your theatre Wed. March 28th, "The End of The Road." Two screenings only, matinee at 3:30 and night at 8:30.

Mrs. C. Williamson attended the banquet given telephone employees in Lethbridge last Friday, taking part in the program.

The weather still continues variable and but slow progress is being made towards conditions that would permit threshing.

R. C. Crane has sold his farm adjoining Champion for a consideration reported at \$5200 per acre, and has purchased a hat and cap factory in Calgary. In consequence he is selling his farm equipment on March 27th by public auction.

FRANK LEONG, Prop'r.

By an error in F. Dalsin's sale bill two sets of breaching harness and one set of work harness were omitted. There is five sets of harness in all.

H. E. Smith, who spent the winter at coast points, eventually landing in California, returned home during the week.

Helen Hoskins is still in the hospital in Calgary recovering from an operation affecting her eyes. She is making splendid progress.

Don Juan at the theatre this week is one of the really big productions and John Barrymore the star is in the finest actors in filmdom.

K. R. McLean, 210-212 Herald Bldg., Calgary, sight specialist wishes to announce that he will visit Champion, at the drug store Friday, March 30, 1928.

Threshing must be close at hand. Recent arrivals in town include Messrs. Roy Roberts and Jim Peggs, the latter being Jack Doyle's right hand man in threshing time.

Married—At Carmangay by the Rev. F. Chapman, on February 19th, Mary Blachly of Carmangay Alberta, to Edouard Le Francois, of Lewiston Idaho U.S.A.—Carmangay Sun.

Taken completely by surprise on Monday evening, the home of Mrs. Le Francois (Mrs. Blachly) was the scene of a jolly gathering of friends of long standing who showered her with a number of attractive gifts the list longer than the alphabet, which created plenty of merriment as they were being unwrapped. Mrs. Le Francois as bright as ever, kept her guests in continual laughter. She leaves shortly to join her husband in the States where she will reside. After lunch the bride was the centre of the ring who joined in singing "For she's a jolly good fellow" and wishing her the best of luck.—Carmangay Sun.

4 Great Advantages

Others would Pay Millions to be Able to Give.

NO carbon troubles... No valve grinding... Lower up-keep cost... No periodic lay-ups... 4 great advantages... The Willys-Knight sleeve-valve engine ensures them all!

The sleeve-valve motor of the Willys-Knight is an exclusive feature which other manufacturers would pay millions to get... but it is protected by patent.

Instead of gradually losing in power and efficiency, in smoothness and silence, as do all cars of poppet-valve design, the sleeve-valve engine of Willys-Knight actually improves with use. It grows quieter, more powerful and more efficient with every mile.

And now—Bellflex Shackles—still another new and exclusive Willys-Knight feature—Bellflex eliminates the metal shackles and provides that the sprung parts of the car are insulated from the body fabric—shock absorbing, rubber-tired—thereby giving permanent chassis silence and diminishing wear at every point of the car.

"70" Willys-Knight Six prices from \$1625 to \$1800; Willys-Knight Great Six, from \$2175 to \$2500; L.C.B. factory, Toronto, taxes extra.

"70" WILLYS-KNIGHT SIX
